Quality Control is for you if…

- Your product has item tracking (lot or serial numbers)
- Your product is regulated
- Your product requires a Certificate of Analysis
- You would like to track metrics on finished goods you manufacture
- You would like to track metrics on the raw material components that go into your finished goods
- You would like to track metrics on production work in process
- You have a quarantine process on incoming goods

Silverware
Business Management Solutions

Quality Control Features

- **Any item with QC can not be sold or used in production until it has passed QC!**
- User-definable test groups & results
- Multiple COA layouts
- QC Approval Process
- Re-testing for failed lots
- Re-work failed lots
- Lab Billing Reconciliation
- Use item tracing to see raw material QC test results
- Supports lot tracking and serial number tracking
